

ACQUARELLA NAIL POLISH

Water Based and Odour Free Nail Polish

Formaldehyde, Toluene, Phthalates and Chemical Solvents Free.

About Acquarella Nail Polish

Acquarella Polish - offers a high quality, chemicals free nail polish based on natural ingredients. The special water-based formula hydrates your nails and allows them to breathe, prevents from chipping, peeling and yellowing, creates strong and beautiful looking nails.

Acquarella Polish is a complete product, so you do not need base coat, top coat or nail hardener. This nail polish offers superb coverage, applies smoothly and dries quickly.

Acquarella offers 64 amazing colours, nail conditioner, nail polish remover and moisturiser.

Great for people with chemical sensitivities, allergies, and those who are not currently using nail polish due to harmful chemicals and vapors.

Your nails will look fantastic and can fit any occasion.

Acquarella Key Features

- ❖ Acquarella nail polishes are water based, non toxic and odour free.
- ❖ Acquarella comes in a wide variety of playful shades that fit any occasion.
- ❖ Fast drying - usually dries "to touch" in 3 minutes, "to use" in 20 minutes.
- ❖ Superb coverage.
- ❖ Chemical solvents free.
- ❖ No Base Coat or Top Coat needed.
- ❖ The shine and colour will last as long as the polish.

What Acquarella Polish does NOT contain:

- ❖ Formaldehyde or Formaldehyde like Derivatives
- ❖ Toluene, Ketones or any Petrochemical Solvents
- ❖ Dibutyl Phthalate (DBP) or other Phthalates

- ❖ Parabens or Camphor
- ❖ Mercury, Lead, FD&C or Coal Tar (Lake) in colorants
- ❖ Gluten or Wheat by-products
- ❖ Any aromatic hydrocarbons.

Detailed Formula Information

Acquarella polish is a water based with a non-toxic, proprietary acrylic emulsion with ultra low residual monomer levels (< 0.1%), ensuring safety. Our non toxic colorants are specially formulated using iron oxide pigments. Our Acquarella Conditioner is a clear polish and free from any colorants.

Ingredients

Aqua (CAS: 7732-18-5), Styrene Acrylates Copolymer, Acrylates Copolymer. May contain: CI 77489 (CAS: 1345-25-1), CI 77492 (CAS: 51274-00-1), Mica (CAS: 12001-26-2), CI 77891 (CAS: 13463-67-7) and/or CI 77499. Product contains no hazardous components under current OSHA definitions. European Union: None of the components of this product are listed in Annexes II, III of Directive 2008/42/EC or 76/768/EEC.

Acquarella Polish Using Guide

For best results with the Acquarella system, we recommend using Acquarella Conditioner to prepare the nails. This preparation cycle accelerates the process of adding moisture to your nail and removes many oils and emollients that interfere with the adherence of Acquarella Nail Polish.

- ❖ **Remove existing nail polish. Wash hands and nails with soap and warm water.**
- ❖ **Buff nails to create a smooth, clean nail surface.**
- ❖ **Swab nails with Acquarella Remover to remove the debris from buffing and prepare nails.**
- ❖ **Rinse nails with clean water and thoroughly dry.**
- ❖ **Shake well nail polish bottle before use.**
- ❖ **Apply two thin coats of Acquarella Conditioner or Nail Polish.**
- ❖ **Acquarella Nail Polish dries in 3 minutes to touch.**
- ❖ **Acquarella Nail Polish dries in 20-30 min to use.**

Acquarella Nail Conditioner can be used as a base coat or top coat if required.

Acquarella Remover Using Guide

The following is the best practice on using Acquarella Remover with our Nail Polish or Conditioner that greatly help the process:

- ❖ Use cotton lint free nail wipes.
- ❖ Pre-apply Remover to all nails using wipes and allow the Remover to “soak in” to the polish surface for at least a minute, rubbing occasionally.
- ❖ Additionally, you can pre-apply in combination with your bath or shower for greater efficacy.
- ❖ With the Remover already working, use the pad to remove a majority of the nail polish alternating nails occasionally. Do not rub all the polish off one nail at one time.
- ❖ When a majority of nail polish is off the nail, using an orange stick put focused pressure on stubborn polish while under running water to assist removal. For toes, doing this in the shower or at the end of a bath will achieve the same effect.
- ❖ The focused pressure with water being present helps the film absorb, expand and deteriorate for easier removal.

Acquarella Remover is specifically designed to remove Acquarella nail polish products only. It will NOT remove conventional nail polishes.

Acquarella Recommendations

The following are some general tips and hints for getting the most out of Acquarella nail care products:

- ❖ Acquarella Nail Polish will wash off up to one minute from application, with standard tap water, if you decide on another color or wish to repaint a nail.
- ❖ Best time to apply Acquarella Nail Polish or Conditioner is right before retiring in the evening. This allows the Acquarella Nail Polish time to “cure”.
- ❖ Give the polish more time to “cure” before coming in contact with soap and shampoos.
- ❖ Do not use lotions or oils before applying nail polish. To moisturize hands before using Acquarella Nail Polish, use Acquarella Moisturizer.
- ❖ If your nail polish starts to thicken over a long period of time, simply add a drop or two of distilled water and shake bottle.
